SUMMARY

Front-End Developer with a strong foundation in HTML, CSS, JavaScript, Tailwind, Bootstrap, and React. Skilled in building responsive, user-friendly applications. Proficient in Git/GitHub and Agile development. Passionate about clean code, accessibility, and continuous learning.

EXPERIENCE

Bytewise Limited

Internship (Frontend Web Development)

June 2024 - September 2024 (Remote)

- Completed internship in front-end technologies: HTML, CSS, JavaScript, Tailwind, Bootstrap, React
- Gained Hands-on experience through real-world projects under mentorship
- Collaborated using Git, GitHub, and Agile boards (Scrum/Kanban)

Elevvo Pathways

Internship (Frontend Web Development)

July 2025 – August 2025 (Remote)

- Developed and optimized responsive web interfaces using HTML5, CSS3, and JavaScript.
- Built dynamic and interactive components with React.js, improving user experience and performance.
- Applied modern design principles with Flexbox, Grid, and reusable UI components for scalability.
- Collaborated using Git and GitHub for version control.
- Delivered real-world projects focusing on clean code and best practices for frontend development.

PROJECTS

Web Development Projects

Technologies: HTML, CSS, JavaScript, React, Redux Toolkit, Hooks

- **Password Generator** – Built a dynamic UI using React Hooks and State management
- **Redux To-Do App** – Implemented task tracking with React and Redux Toolkit for efficient state handling
- **Background Changer** – Built a colour switcher app using React Hooks and user-triggered state updates
- **Theme Toggle** – Created persistent light/dark mode using Redux Toolkit and local storage
- **Currency Converter** – Enabled conditional rendering and currency display using React State and Events
- **Personal Blog Homepage** – A responsive blog homepage built with React, featuring post cards, category filters, keyword search, and pagination in a clean grid layout.
- **Contact Form** – Developed a responsive and functional contact form using HTML, CSS, and JavaScript for better user interaction.

- **Weather Dashboard** – Built a responsive weather dashboard in React that displays real-time weather data and a 3-day forecast using the OpenWeatherMap API. Features include city-based search, dynamic rendering, loading states, and a clean UI.
- **TaskFlow** – A responsive one-page React app for task management, including features, pricing plans, user testimonials, and scroll animations, all in a modern UI.
